SECRET

30 January 1963

MEMORANDUM FOR: Chief, Planning Staff, Office of Logistics

SUBJECT: HPIC's Comments on Draft Entitled, "Case
History on Buildings 213 and 213A"

1. We have been over the entire draft in detail and are in agreement with all parts of it with which we are familiar or competent to judge with the following exceptions:

Page 2 of the Memorandum, the sentence starting on line 13 from the top delete the words, "Based on ... IMJN" and substitute the following:

Based upon HPIC's requirements and the availability of space in the area, ...

First Page, Enclosure 4 Delete entirely the opening sentence and substitute the following:

The planning, design and layout work performed earlier by [] under contract to HPIC made [] the logical choice for award of the A&E contract by GSA.

50X1
50X1

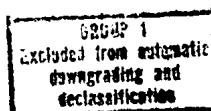

Second Page, Enclosure 5 Delete entirely the opening sentence and substitute the following:

The A&E contract, which was negotiated with [] by GSA in conjunction with Agency personnel, provided continuity of effort through the extension of the earlier IMJN/HPIC planning work.

50X1

2. While we are ^{not} qualified to pass on the figures of the cost estimates submitted in the attachments, we would like to call attention to Item 9, Annex C, a figure of \$80,000 for elevators owing to the peculiar laboratory type facility. Offhand, we are at a loss to explain this unless they are referring to the particular costs of construction of the UGUM elevator tower which is attributable to security requirements as opposed to laboratory requirements.

**SUBJECT: NPIC's Comments on Draft Entitled, "Case
History on Buildings 213 and 213A"**

3. There are two pieces of correspondence which you have not included as attachments which we would like to call to your attention. First is the letter from McGeorge Bundy to the Director, and second, the Director's reply. I think of particular note in the Director's reply is the statement to the effect that it was literally impossible at that time to estimate the ultimate construction costs.
